SUBSCRIPTION & USAGE RATES

Pricing has two parts: a fixed **platform fee** for the service itself, and **metered usage** that scales with how much the AI receptionist actually works for you. You only pay AI usage for the minutes and chats you use.

Component	What it covers	Rate
Platform fee — per location	24/7 AI receptionist (voice + web/mobile chat), staff dashboard & calendar, appointment booking/cancel/reschedule, patient records, call & chat logs, email confirmations, 3 languages (EN/HU/DE), secure EU hosting, monitoring, backups, updates & support	€249 / month
Additional location	Same features, pooled usage rates	€149 / month
Voice AI usage	Per minute of AI-handled phone conversation (billed per second)	€0.35 / minute
Chat AI usage	Per completed chat conversation (any length)	€0.25 / conversation
Phone number	Local number rental (pass-through)	€5 / month
Setup (one-time)	Onboarding, agent & voice tuning, number setup/forwarding, staff training — ☐ waived with annual billing	€490

Worked example — typical single-location month

Platform fee	€249.00
Voice: ~300 calls × ~3 min = 900 min × €0.35	€315.00
Chat: ~200 conversations × €0.25	€50.00
Phone number	€5.00

Estimated monthly total **€619.00**

A quieter month (~450 min, ~100 chats) lands around €436. Compare: a human answering service runs €800–1,500/month for business hours only.

Why usage is metered — where the money goes. Every AI minute has a real cost we pay per call on your behalf: speech recognition & voice synthesis, the language model that understands and answers your patients, telephony, and the secure EU infrastructure (hosting, database, monitoring, backups) that runs your dashboard. Metered billing means a quiet month costs you less, a busy month pays for itself in bookings — and you never subsidise another clinic's call volume.

Rate stability: usage rates are fixed for your initial term; thereafter they may only change to reflect material changes in underlying AI-provider pricing, with 30 days' written notice.

BILLING SELECTIONS

- ☐ Billing: Monthly
 ☐ Annual (2 platform-fee months free + setup waived)
- ☐ Initial term: 1 month
 ☐ 12 months

Locations: ____ · Phone numbers: ____

Monthly usage alert threshold (we notify you above): €_____

☐ Founding-customer pilot: platform fee **€99/mo** for the first **3** months

Renewal notice: **30 days** · Platform fee billed in advance; usage billed monthly in arrears with an itemised statement (minutes & conversations).

(usage at standard rates), in exchange for feedback + a reference testimonial.

ONBOARDING INPUTS (NEEDED TO GO LIVE)

- ☐ Clinic opening hours per day
- ☐ Providers (names, specialties, hours)
- ☐ Appointment types & durations
- ☐ Top FAQs (location, parking, insurance)
- ☐ Preferred AI voice & language(s)
- ☐ Phone number to forward / port
- ☐ Staff accounts (name, email, role)
- Target go-live date: _____

COMPLIANCE ACKNOWLEDGMENT (REQUIRED)

By signing, the Customer confirms it understands and agrees that:

☐ The Customer is the **Data Controller**; the Provider is the **Data Processor**. A **Data Processing Agreement** is signed alongside this Order Form.

☐ The Customer will display a **patient privacy notice** stating calls may be handled by an **AI assistant** and **recorded**.

☐ The **in-call AI disclosure stays enabled** (the agent identifies the clinic, purpose, and its AI nature) and will not be disabled.

☐ The Customer obtains any **patient consents** required under GDPR / local healthcare-privacy law.

☐ The AI is an **operational support tool**, may occasionally err, and staff review bookings & call records as normal.

☐ Subprocessors (e.g. [Retell AI, Anthropic, OpenAI & Cartesia via Retell, Hetzner, telephony, email]) are listed in the DPA; the Customer consents to their use.

If the clinic or any called patients are in the US, additional rules (e.g. TCPA, possibly HIPAA) apply — flag this so the Provider can adjust the setup.
